

Navigating the Dell EMC SourceOne Transition

Secure Your Data's Future with Our Seamless Migration Services and Advanced Governance Platform

Is your organization ready for the [Dell EMC SourceOne end-of-life](#)? With the December 31, 2024, deadline fast approaching, proactive steps are essential to prevent compliance breaches and secure your data against emerging threats.

Current Situation with Dell EMC SourceOne

Dell EMC SourceOne will soon stop receiving security patches and maintenance updates, making it more vulnerable to security threats and compliance issues. After this date, there will be no guaranteed support for maintenance or access to new features, technology, or fixes.

Implications for Your Business

Remember these key points:

- Upgrade or face attacks. Your organization's data grows by 40% annually, with 35% being sensitive personally identifiable information (PII)¹. Outdated systems increase the risk of data breaches and operational vulnerabilities.
- Comply or be penalized. Non-compliance could result in fines of up to \$1.1 billion for failing to preserve records across new digital platforms². Modern compliance solutions are crucial to avoid severe financial penalties.
- Modernize or miss red flags. Inefficient manual compliance reporting can lead to missed red flags. Modernizing your systems is essential to avoid legal and regulatory consequences.

Your Options

Many alternatives may suggest migration paths, yet they fall short of offering comprehensive, adaptable solutions that align with diverse organizational needs. These solutions often propose cloud-only strategies, disregarding the nuances of hybrid or on-premises requirements, and generally lack integrated features essential for robust [information governance](#).

Veritas - The Most Capable Replacement for SourceOne

Veritas goes beyond regular archiving, providing a unified compliance and governance framework that meets current needs and can adapt to future regulatory changes. The platform offers deployment flexibility (on-premises, hybrid, cloud) to suit any business environment.

- **Data Aggregation and Analysis:** By aggregating data from 120 sources and analyzing it, you gain strategic insights and improve operational efficiency.
- **Data Quality and Governance:** We help you eliminate unnecessary data and ensure compliance with relevant policies, saving time and resources.
- **Secure Data Archiving:** Our secure archiving ensures compliance with regulations and enhances data security, giving you peace of mind.
- **Case Lifecycle Management:** Our AI tools streamline case management, saving time and improving efficiency.
- **Risk Detection and Remediation:** We proactively detect and address privacy risks, helping you maintain compliance with global regulations and protect your reputation.

Key Benefits of Veritas Data Compliance and Governance

- **Global Compliance:** Easily comply with global regulations, minimize non-compliance risk, simplify regulatory adherence to avoid fines, and enhance operational transparency.
- **Flexible Deployment:** Support for cloud-native services like Azure, AWS, and Google ensures data sovereignty and allows scalable resource utilization that aligns with your security policies.
- **Maximize Resource Utilization and Modern Security Standards:** Adopt cutting-edge security standards to protect your data against emerging threats while maximizing resource utilization.

The Time to Act is Now

The clock is ticking, and time is running out. **Don't wait until the last minute to move your legacy archives; it can be a complex process.**

We are here to help with comprehensive support for stakeholder engagement, planning, and executing a tailored migration strategy using our advanced platform. During the migration process, you'll gain insights into your data's lifecycle, uncovering previously unrecognized Dark Data, which can lead to a deeper understanding of how your data is managed.

We understand the pressures on compliance budgets and are committed to supporting your organization's transition. Our proven migration services have helped numerous organizations transition to modern, future-proof solutions, setting them up for a compliant, secure future. Whether you need a standard prebuilt tool or a custom migration solution, we can accelerate your move and assist with various migration tasks, including data exchange, retention category transfer, legal holds, and more.
